

MAXIME ROCHE

Department of Economics & Public Policy
Imperial Business School, Imperial College London

Updated: 9 March 2026

PERSONAL DATA

ADDRESS: South Kensington Campus, Exhibition Rd, London, SW7 2AZ, United Kingdom
EMAIL: m.roche21@imperial.ac.uk WEBSITE: <https://www.maximeroche.com>

EDUCATION

2022-2026 PhD Candidate in ECONOMICS & PUBLIC POLICY, **Imperial College London** – UK
Affiliation: Centre for Health Economics & Policy Innovation
Advisors: Prof. Franco SASSI, Dr. Laure DE PREUX
Expected graduation: Spring 2026

2021-2022 Awarded **Distinction** for MRes in ECONOMICS & PUBLIC POLICY
Imperial College London – UK

2017-2018 Master of Sc. in ECONOMICS, **University of Amsterdam** – Netherlands

2013-2017 Master of Sc. in CORPORATE FINANCE & BANKING, **EDHEC Business School**
Bachelor's degree in BUSINESS MANAGEMENT, **EDHEC Business School** – France

2011-2013 Preparatory classes in MATHEMATICS & PHYSICS for the entrance exams to top
French engineer & business schools, **Lycee Joffre (Montpellier)** – France

VISITING

SPRING 2025 Visiting researcher, hosted by DR. ARIEL ORTIZ BOBEA
Cornell University, Dyson School of Applied Economics & Management – NY, USA

SPRING 2016 Exchange semester in Master in ECONOMICS & PUBLIC POLICY
Universidad Adolfo Ibáñez – Chile

FIELDS OF INTEREST

Applied microeconomics (health, development, agriculture, climate change) & Food policy

SCHOLARSHIPS AND AWARDS

2025 Imperial College London's Global Fellows Fund, **Turing Scheme**
Overseas research funding $\approx$ GBP 1,700

2021-2025 London Interdisciplinary Social Science Doctoral Training Partnership,
UK Economic and Social Research Council
Full-time tuition & stipend allowance + Research & training funds $\approx$ GBP 144,000

TEACHING EXPERIENCES

- FALL 2024 & 2025 Tutorial leader, MICROECONOMICS 2 (student feedback: [4.7/5 \(24\)](#); [4.6/5 \(25\)](#))
BSc Economics, Finance & Data Science; **Imperial College London**
Course leader: Prof. Tommaso Valletti (t.valletti@imperial.ac.uk)
- FALL 2024 Teaching Assistant, HEALTH ECONOMICS ([student feedback: 4.8/5](#))
MSc Global Health Management; **Imperial College London**
Course leader: Prof. Marisa Miraldo (m.miraldo@imperial.ac.uk)
- YEAR 2017-2018 Teacher, MATHEMATICS FOR ECONOMICS & FINANCE
Pre-BSc programme in Economics & Business; **University of Amsterdam**
Course leader: Evgenia Papoula (epapoula@oncampus.global)

PROFESSIONAL EXPERIENCES

- FEB 2025 - present Research assistant, Foresight & Policy Modeling Unit
International Food Policy Research Institute, Washington DC (remote)
- JUN 2023 - MAR 2024 Research assistant, Centre for Health Economics & Policy Innovation
Imperial College London, London, UK
- APR 2022 - JUL 2023 Consultant, Fiscal Policies for Health team
World Health Organization (WHO), Geneva, Switzerland (remote)
- MAR 2019 - AUG 2021 Consultant, Economics of Noncommunicable Diseases team
Risk Factors & Nutrition Unit
Pan American Health Organization (WHO - Americas), Washington DC
- DEC 2018 - MAR 2019 Consultant, Health, Nutrition & Population Global Practice,
World Bank, Washington DC

JOB MARKET PAPER

- [Smallholder Farming Households Nutrition Under Extreme Heat: Vulnerabilities and Adaptation](#), solo-authored

***Abstract:** Climate change threatens food security in Sub-Saharan Africa, but the magnitude of its nutritional impacts and the household-level behaviors that mediate them remain understudied. I examine how extreme heat during the crop growing season affects the commercialization and consumption decisions of Nigerian smallholder farming households, and how these responses shape post-harvest nutrition. Using five waves of panel data (2010–2024) linked to high-resolution weather, I exploit within-household variation in growing-season temperatures. Results show that hotter seasons depress harvests and reduce diet quality while leaving total caloric intake unchanged. I estimate that a +1°C warming would result in 1.62 and 0.63 million additional households with inadequate protein and iron intake, respectively. Less educated households and those with young children, who require protein and iron for growth, are more adversely affected. I demonstrate that households reduce crop commercialization to safeguard calories from own-produced staples and cut their purchases of nutritious and cash-intensive foods. This reflects a risk-minimizing behavior under incomplete food and labor markets and binding caloric constraints. In line with this, I find no evidence of adjustments in off-farm labor. Findings suggest that on-farm adaptation alone cannot maintain diet quality under climate change, underscoring the need for integrated policies that extend beyond calorie sufficiency and pair market participation and labor market development strategies with climate-risk mitigation.*

PEER-REVIEWED ACADEMIC PUBLICATIONS

- [Taxation of foods high in fat, sugar, and sodium in India: A modelling study of health and economic impacts](#) (*PLOS Medicine*, 2026)
